BACK TO SCHOOL 2022 LOOK WHAT'S NEW!

McGraw Hill's supplemental learning solutions are designed to support your core curricula and drive equity, engagement, and growth. For the 2022-23 school year, we'll be introducing several powerful, new features for Achieve3000 Literacy.

Instructional Integration

NEW *Wonders* Integration

Customers using *Wonders* and *Achieve3000 Literacy* can now take advantage of paired reading texts! Teachers in grades 2-6 can now use the *Wonders* lesson collection to connect *Achieve3000 Literacy* lessons to *Wonders* reading texts. The alignment document also provides discussion questions to support class conversations and connect the two texts. **Available: Now**

More *WordStudio* Lessons for Grades 6-12

The amazing *WordStudio* collection continues with a new set of lessons focused on reading comprehension. Targeting foundational literacy skills for secondary students, this phase of the project will contain 26 lessons addressing nine reading comprehension strategies such as making predictions and inferences, context clues, main idea and details, text structure, and textual evidence. **Available: Starting in late August**

Amazing Short Stories for Grades 9-12

These short stories align to state and Common Core high school fiction literacy standards, providing rich opportunities for high school students to explore and analyze figurative and connotative meanings, text structures, complex characters, and other literary elements. Each story contains a set of teacher materials to facilitate guided instruction and teacher-led discussions. **Available: Now**

Stay Current with the Headlines Collection

Customers have been asking for more current event articles and also want them to include activity questions. Our new Current Events channel—2022 Headlines—is the answer! Each lesson features a timely news article followed by four

activity questions at every level. Many of these lessons will also include a graphic or video component. **Available: Now and published monthly**

Support Instruction with *WordStudio* for Grades 2-5

Due to the overwhelming popularity of our *WordStudio* secondary lessons, we're extending the series to elementary students this year. Modeled after the secondary content, the components will include phonics, word analysis, reading comprehension, and fluency and follow the scope and sequence from grades 2-5. Lessons will also include teacher-led video components. **Available: Lessons will be released on a rolling basis later in the fall**

Equity, Engagement, and Growth

Explore Career Options with NEW Career Center Videos

To help students learn more about careers of interest, we've added 75 new videos to the Career Center! These engaging videos help students to hear from someone working in that field before learning more about the academic and Lexile requirements for that position. **Available: Now**

Keep Students Focused with NEW Dashboard

Our new, student-focused dashboard puts the information students need right at their fingertips! This redesign of the student home page increases personalization and engagement by bringing lesson and goal-tracking information front and center. It also draws students' attention to key areas such as My Messages (Notifications/Email), My Lessons (Favorites, Lesson Completion, Scores), and My Scoreboard (Lexile Tracker, Points/Achievements).

Available: Now

Expanding Toolbar Use with Enhanced Options

As we continue to enhance and improve the toolbar options available to students, this school year we're excited to announce that the strikeouts and highlighting tools will be available for use in the Instruction panel for students. This allows them to take advantage of these tools while working with multiple-choice questions, a desired test-taking skill that teachers have requested. In addition, there are more languages available for both text (now 105 languages) and audio support (now 29 languages), supporting students from diverse language backgrounds. This release also improves toolbar compatibility with iPads. **Available: Now**

Improved Progress Monitoring to Support Emerging Readers

We're taking a new path to support students previously identified as developing readers. For the upcoming school year, all students, regardless of Lexile level, will be eligible for monthly Lexile adjustments. Students with a Lexile score of 50L or below will be identified as Emerging Readers, indicated by an icon on key reports. As these students work towards improving their reading skills, the system will adjust the text complexity as needed throughout the school year without waiting for an additional LevelSet assessment. All students will also see a Lexile Tracker on their home page in the My Scoreboard panel on their dashboard. **Available: Now**

Hear from Students with Star Ratings

Students can now provide direct feedback about the lessons they have read using the new star rating system. Students can share their reactions to the content while providing valuable information to teachers and our content development teams about their interests and reading preferences. **Available: September**

Bring Careers into Focus with the NEW My Future Dashboard Tab

We're making the Career Center a bigger focus for students by moving it into the new student dashboard. Now, students can more easily access the Career Center, tracking their top career, watching candid career videos, and exploring all the career options available to them. Students click the My Future tab in the dashboard to access all these amazing features. **Available: September**

Flexibility

Stay Connected with Customizable Class Announcements

Teachers will now be able to create customizable messages that will display on the student home page. Messages can contain links and other useful information to help students feel connected in any type of learning environment. **Available: Now**

Frictionless Integration

Ensure a More Accurate Placement for LevelSet

Placing students in the correct version of the LevelSet assessment is one of the best ways to ensure an accurate result. The LevelSet Locator Test presents students with a few initial assessment items to help place them in the proper version of the LevelSet assessment. Seamless to students, these first few items help reduce the overall testing time and help ensure an effective and efficient testing session. **Available: Now**

Manage LevelSet Administration More Efficiently with NEW Scheduling Tools

We're putting LevelSet scheduling right into the hands of teachers, district and school administrators. Our new LevelSet scheduling tool allows administrators to manage dates, control who can revise assessment dates, and more easily reset students' assessments as needed. **Available: Now**

Monitor Progress with Interactive Lexile Data

The Data Center is the primary tool to help teachers monitor student progress and the health of their classroom implementation. To support teachers in their everyday work, we've enhanced the Lexile data in the Class Overview tab of the Data Center. Now, teachers can click on the Lexile score spark line to view detailed Lexile data for that specific student across the school year. The initial release will include a Lexile tracker with an interactive legend. Additional features will be released during the course of the school year. **Available: Now**

Zoom in on Data with Customizable Display

To help teachers customize the information displayed on the Class Overview tab of the Data Center, we're releasing a new tool allowing them to show or hide specific columns. This will be incredibly useful for helping teachers focus on the information they need and sharing relevant information with students and parents. **Available: Fall**
